

ConnectWise API Integration Setup & Guide

Create an API Member and API Key in ConnectWise

The ConnectWise Manage integration requires a ConnectWise API key to retrieve and publish data to and from your GetKambium account. GetKambium only supports using ConnectWise API keys for accessing ConnectWise Manage, we do not support User Impersonation or Cookie Authentication.

This is configured in the ConnectWise Internet Client (available from ConnectWise) and this integration requires both the **Public Key** and **Private Key** elements of the API Key.

Create a Custom Security Role

GetKambium follows the design principal of 'least privilege'. Do not create a security role with full admin privileges, or privileges above what is requested as the system will not accept the API Key.

1. Go to System > Security Roles
2. Click the plus (+)*New Item* button in the Security Roles section
3. Enter a name for the Role ID
4. Click Save
5. Configure the roles settings in the **Security Modules For Role - <New Role Name>**
Please ensure the permission are set as per the GetKambium ConnectWise Security Role Permissions table.
6. Click Save and Close to apply

GetKambium ConnectWise Security Role Permissions				
	Add Level	Edit Level	Delete Level	Inquire Level
Companies				
Company Maintenance				All
Configurations				All
CRM/Sales Activities	All			All
Finance				
Agreements				All
Procurement				
Product Catalog				All
Marketing				
Marketing Management				All
Sales				
Opportunity	All			All
Service Desk				
Service Tickets	All			All
System				
Member Maintenance				All

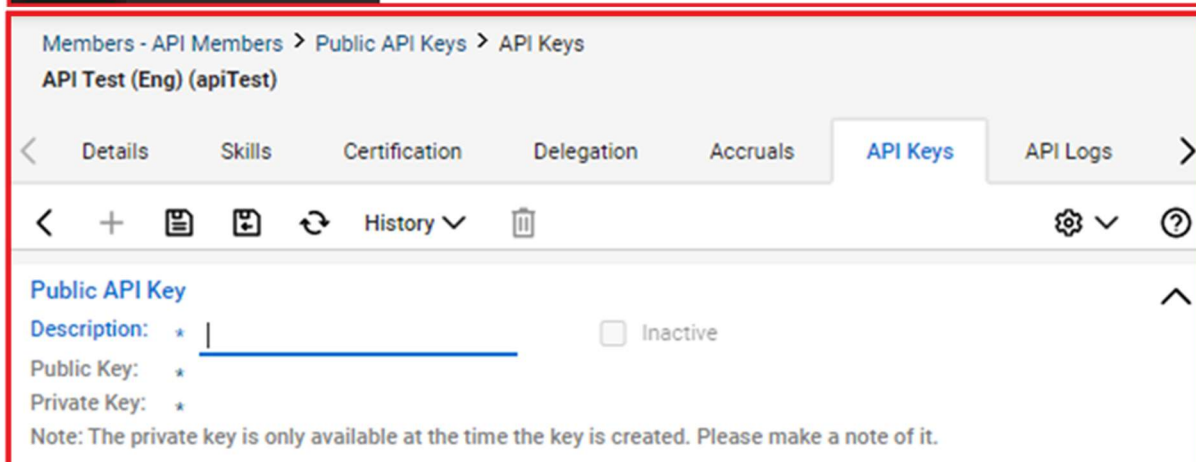

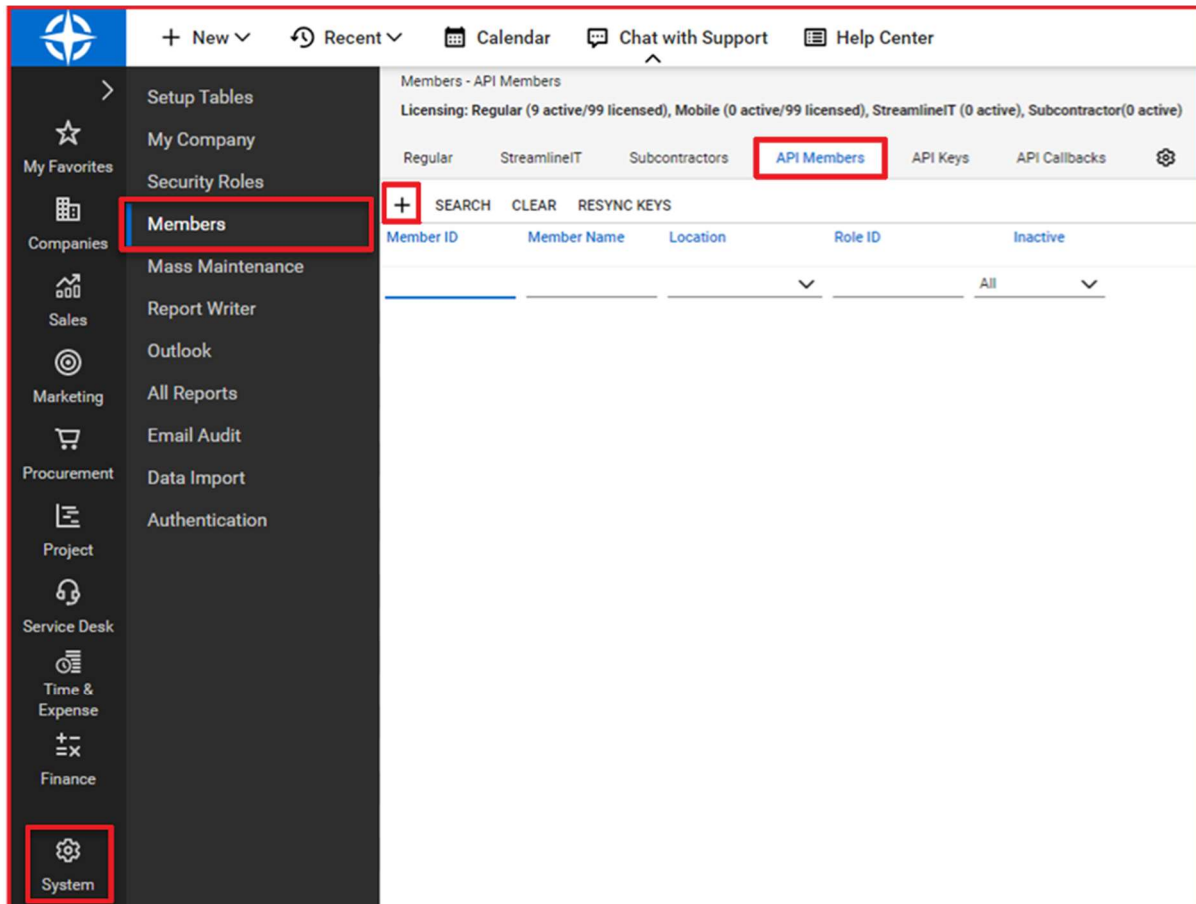

Create the API Member

1. Go to System > Members
2. Choose the API Members tab
3. Click the plus (+)*New Item* button in the API Members tab
4. Complete the information in the New Member form
5. Choose your custom security role created above for the Role ID

6. Click **Save and Close** to apply

Generate the API Key

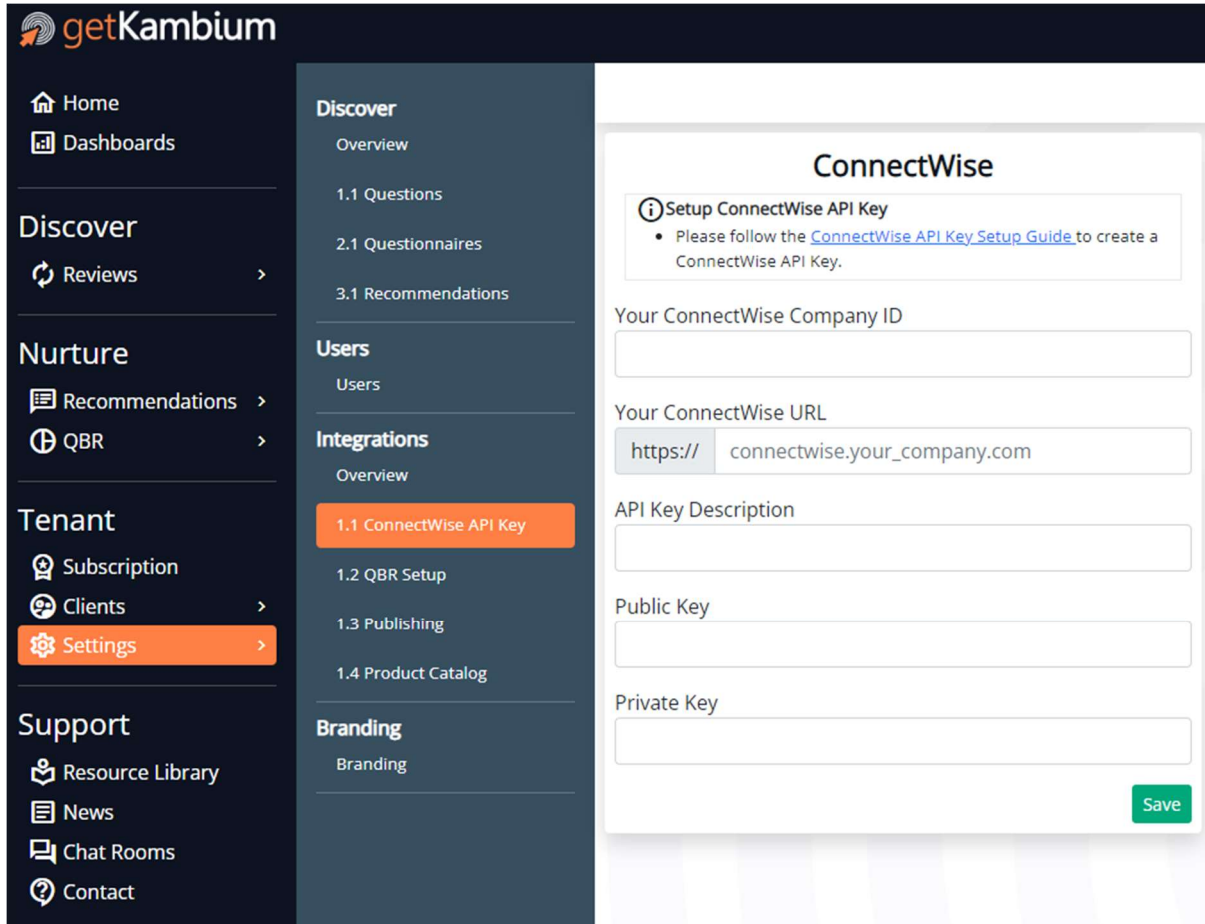

1. Open the newly created **API Member**
2. Go to **API Keys**
3. Click the plus (+) *New Item* button in the **API Keys** tab
4. Enter a **Description** for the API Key
5. Click **Save**
6. This displays the **Public Key** and **Private Key**. Store these in a secure location, they are to be used for the GetKambium integration.

Save the API Key in GetKambium

1. Navigate to:

- a. *Settings – Integrations > 1.1 ConnectWise API Key*
2. Fill in the **ConnectWise** form with the relevant Company ID and ConnectWise URL for your ConnectWise Manage.
3. Use the Role ID or Member Name created above for the API Key Description.
4. Provide the Public and Private Key and click **Save**

The screenshot displays the getKambium user interface. On the left is a dark sidebar with navigation options: Home, Dashboards, Discover (Reviews), Nurture (Recommendations, QBR), Tenant (Subscription, Clients, Settings), and Support (Resource Library, News, Chat Rooms, Contact). The 'Settings' option is highlighted in orange. The main content area shows a 'Discover' menu with 'Integrations' selected, leading to '1.1 ConnectWise API Key'. The form titled 'ConnectWise' includes an information box with a link to a setup guide, and input fields for 'Your ConnectWise Company ID', 'Your ConnectWise URL' (pre-filled with 'https:// connectwise.your_company.com'), 'API Key Description', 'Public Key', and 'Private Key'. A green 'Save' button is located at the bottom right of the form.

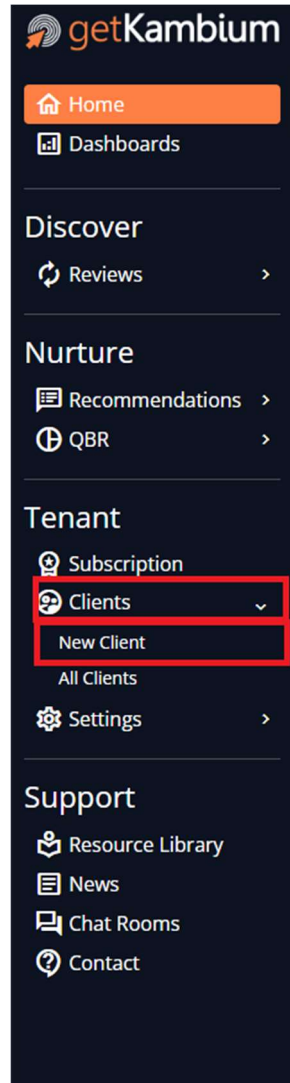

Client Setup

Clients in GetKambium can be linked to ConnectWise company records for publication of Opportunities and Tickets, and the retrieval of data for presentation in QBRs.

Single New Client

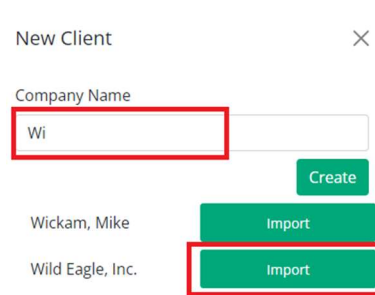

To import a single Client from ConnectWise

1. Click *Clients – New Client*

2. In the **New Client** form enter the Company Name. GetKambium will search ConnectWise for matching company names and display them below.

1. Click **Import** on the desired company.

New Client ×

Company Name

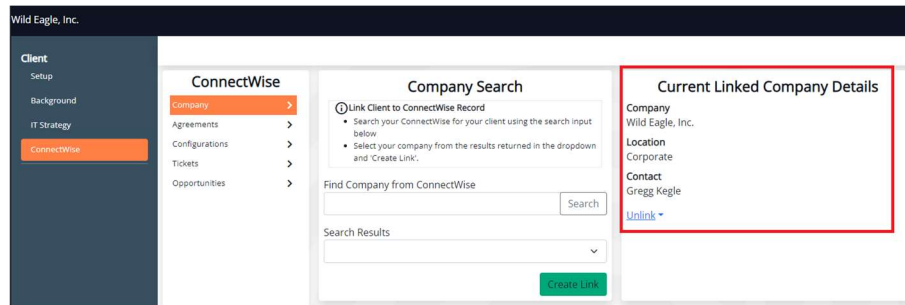

Wi

Create

Wickam, Mike Import

Wild Eagle, Inc. Import

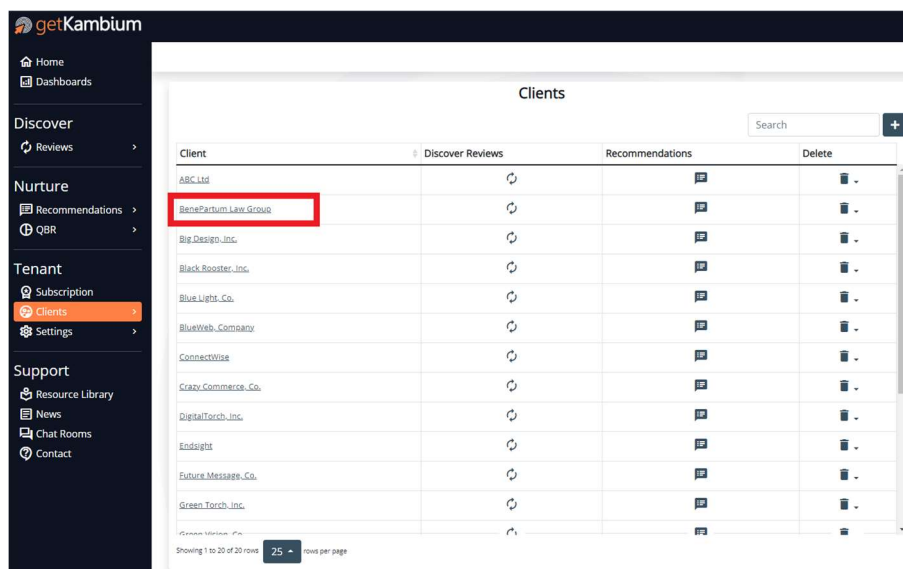

3. Ensure the **Current Linked Company Details** are correct under **Client ConnectWise – Company**.

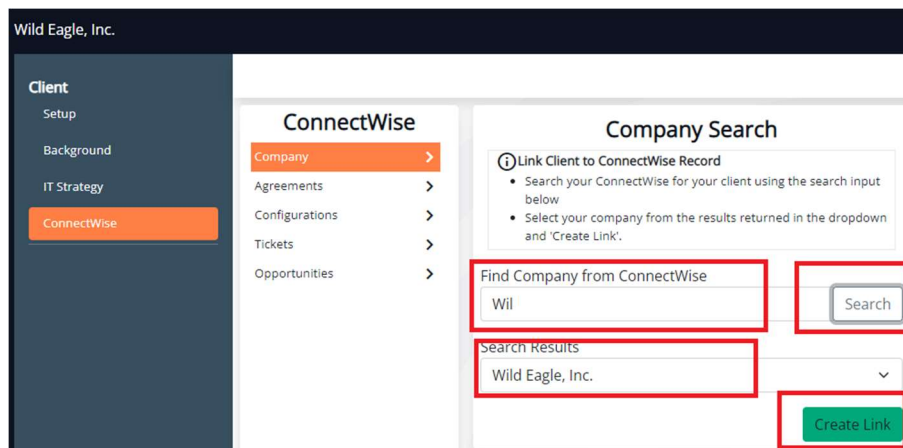

Single Existing Client

To link a Client that exists in GetKambium to a ConnectWise company.

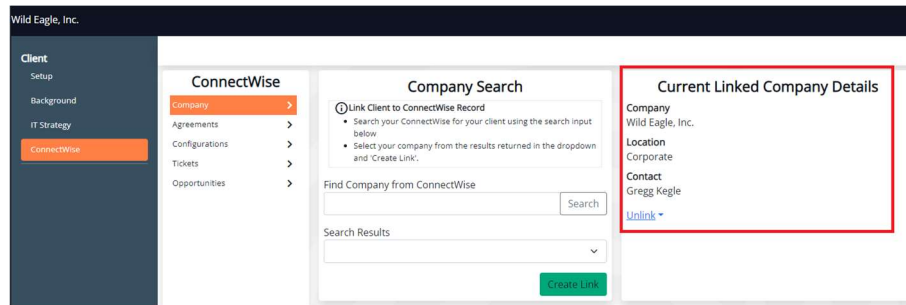

1. Navigate to *Client > All Clients*
2. Select the desired Client from the **Clients** table

3. Navigate to *Client ConnectWise – Company*
4. Search for the company in **Find Company from ConnectWise** field and click **Search**.
5. Select the appropriate Client record under **Search Results** and click **Create Link**.

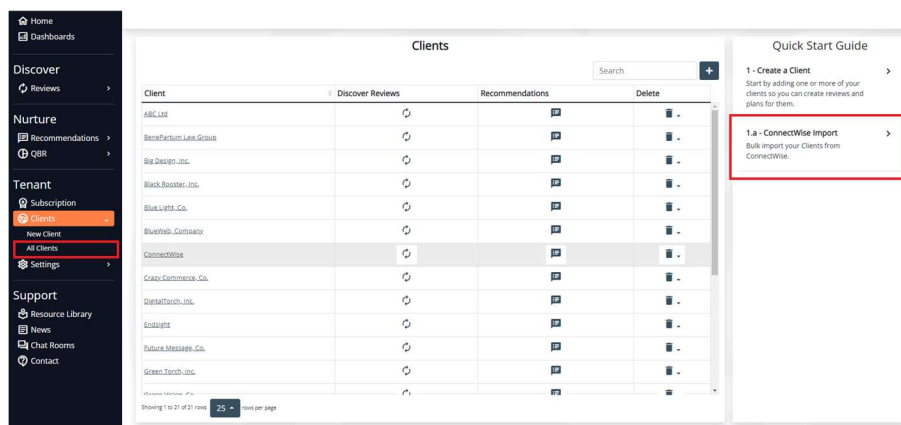

- Ensure the **Current Linked Company Details** are correct under **Client ConnectWise - Company**.

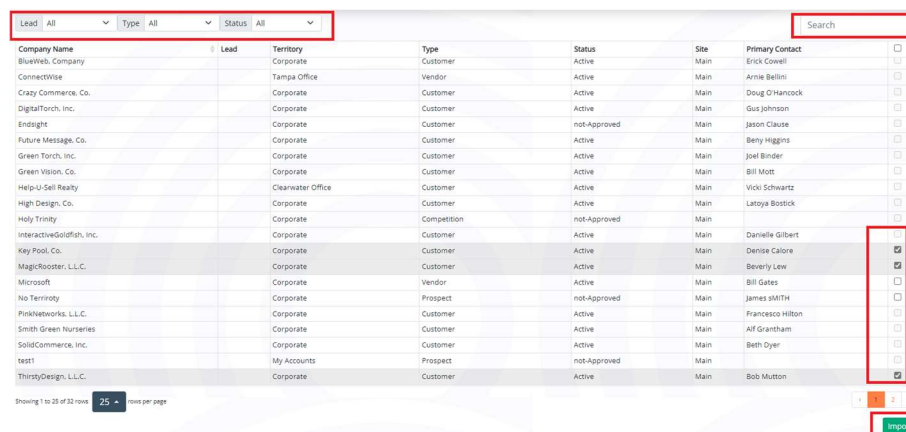

Multiple Clients

To import multiple Clients from ConnectWise.

- Navigate to *Clients > All Clients*
- Click **ConnectWise Import**

- Use the table filters or search box to find companies. Check the companies you want to import and click **Import**.

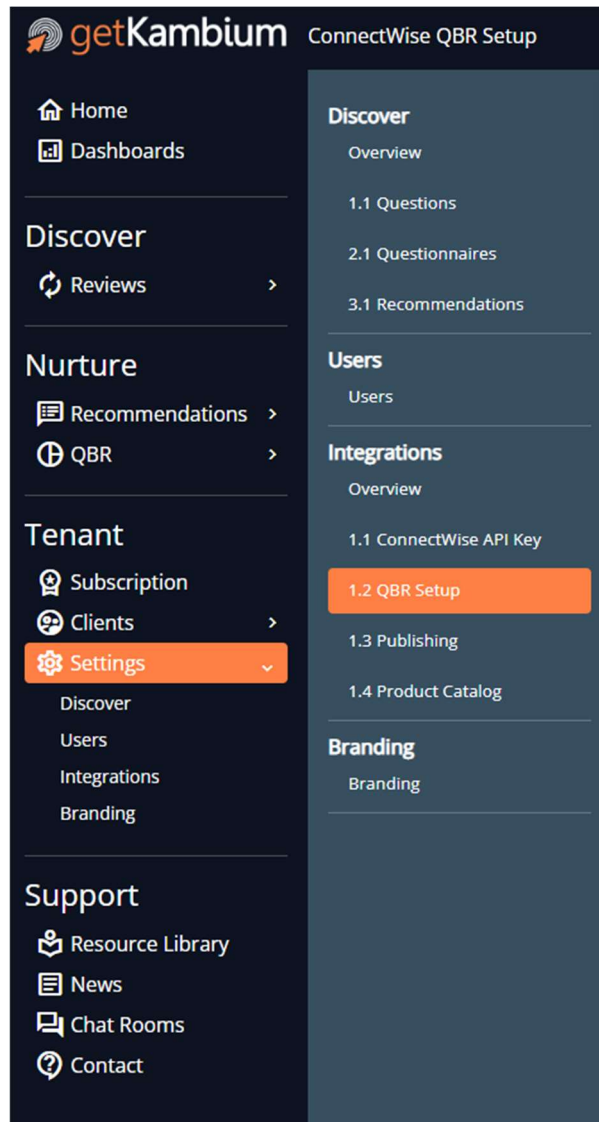

QBR Setup

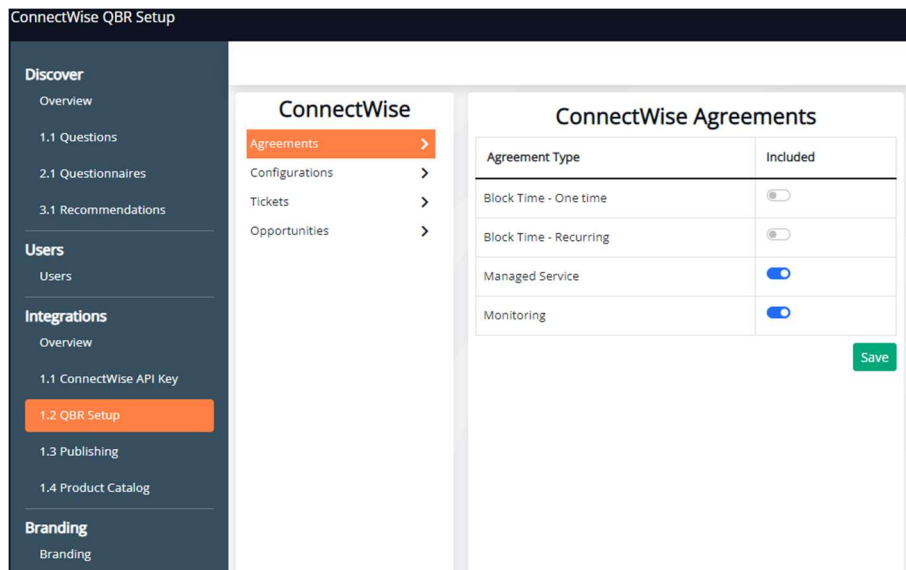

Tenant-Wide Defaults

To have information pull from ConnectWise into the GetKambium QBR, begin by setting the tenant-wide defaults in GetKambium.

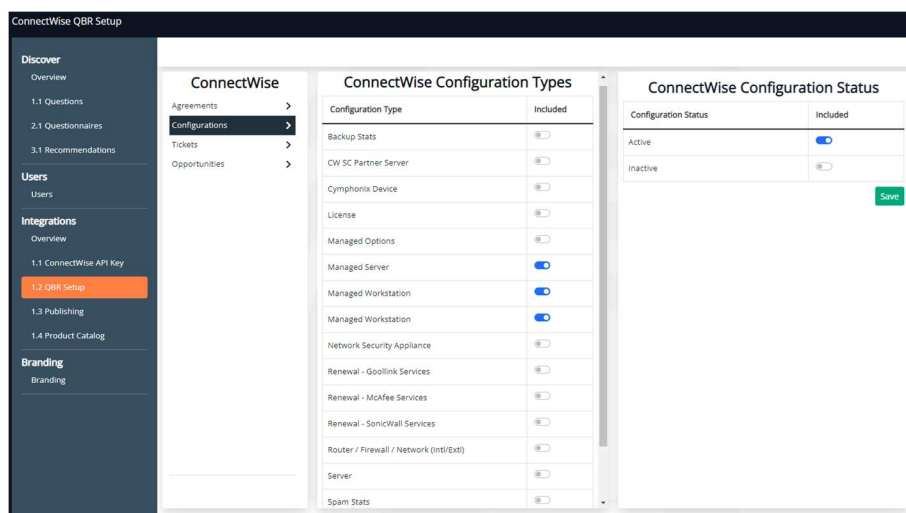

1. Navigate to:
 1. *Settings - Integrations > 1.2 QBR Setup*

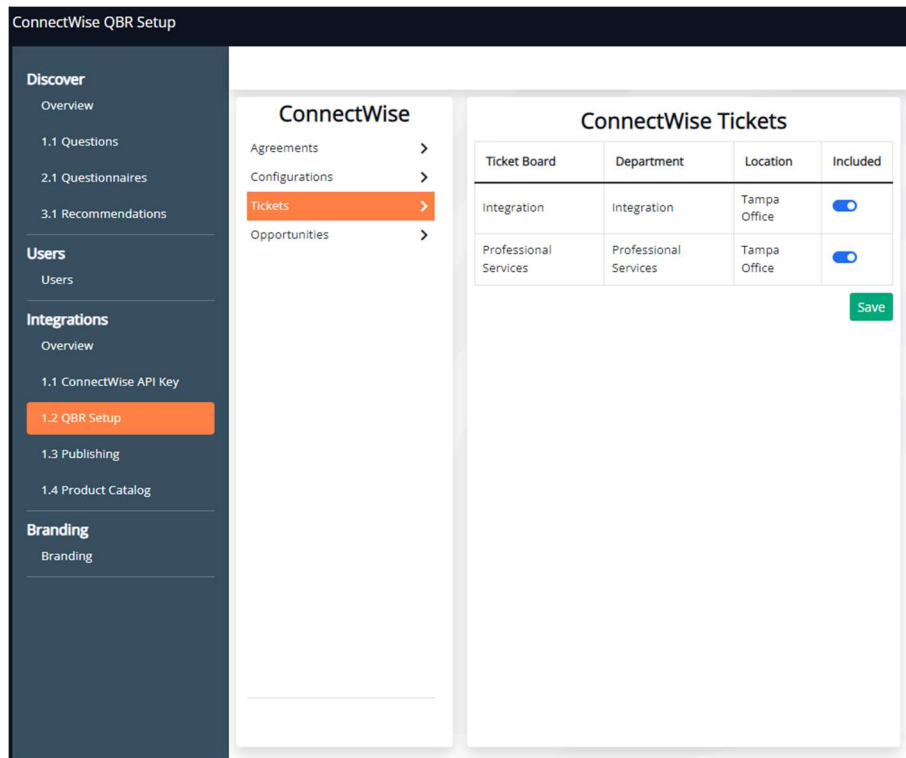

2. In *1.2 QBR Setup - Agreements* **ConnectWise Agreements** toggle on/off the Agreement Types that you want to include in the QBR by default and click **Save**.

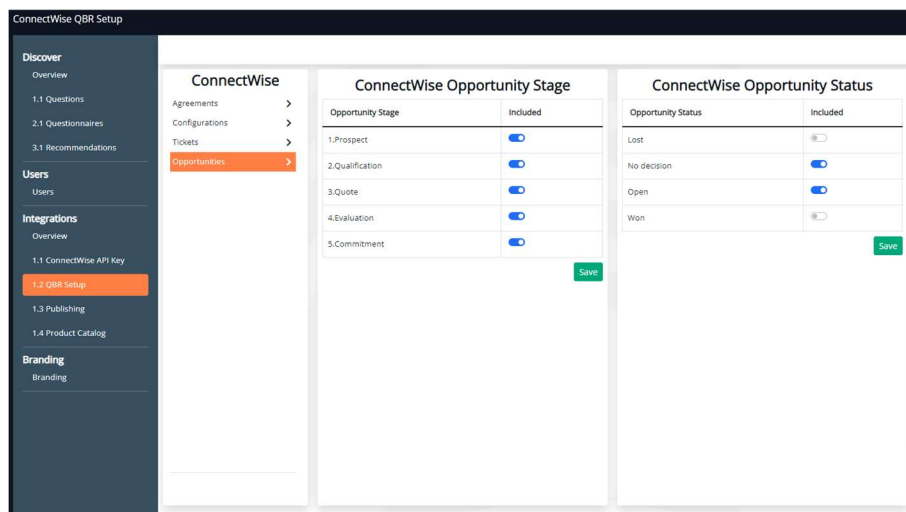

- In 1.2 QBR Setup - Configurations **ConnectWise Configuration Types** and **ConnectWise Configuration Status** toggle on/off the Configuration Types and the Configuration Statuses that correspond to Client Device Assets that you want to include in the QBR by default and click **Save** for each pod.

- In 1.2 QBR Setup - Tickets **ConnectWise Tickets** toggle on/off the Ticket Boards that you want to include in the QBR by default and click **Save**.

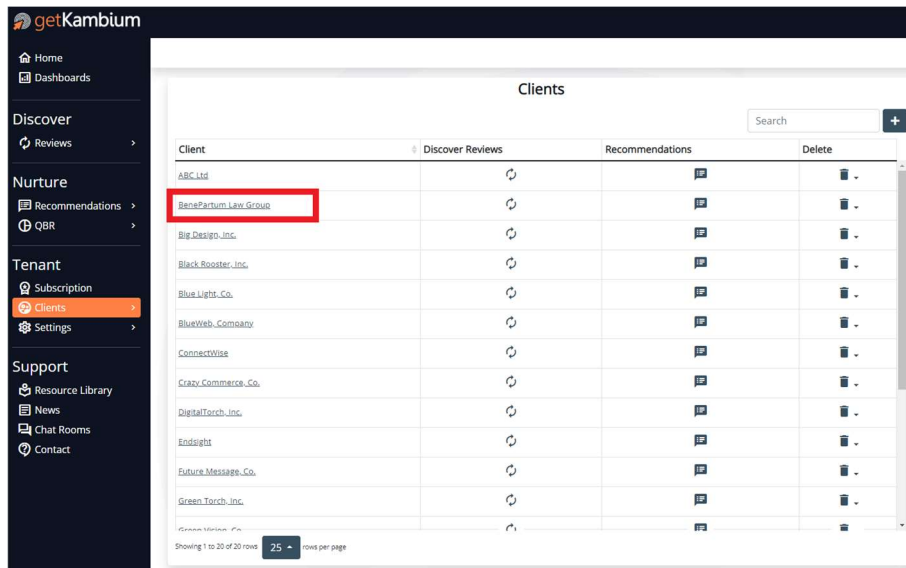

- In 1.2 QBR Setup - Opportunities **ConnectWise Opportunity** Stage and **ConnectWise Opportunity Status** toggle on/off the Opportunity Stages and Opportunity Statuses that you want to include in the QBR by default and click **Save** for each pod.

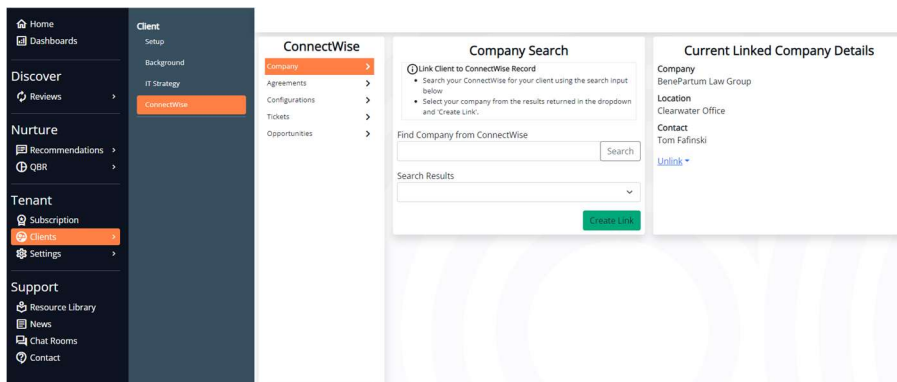

Client-Specific Setup

The QBR Tenant-wide defaults can be over-riden for individual clients.

- Begin by navigating to:
 - Clients > All Clients*
- Select a Client from the **Clients** table

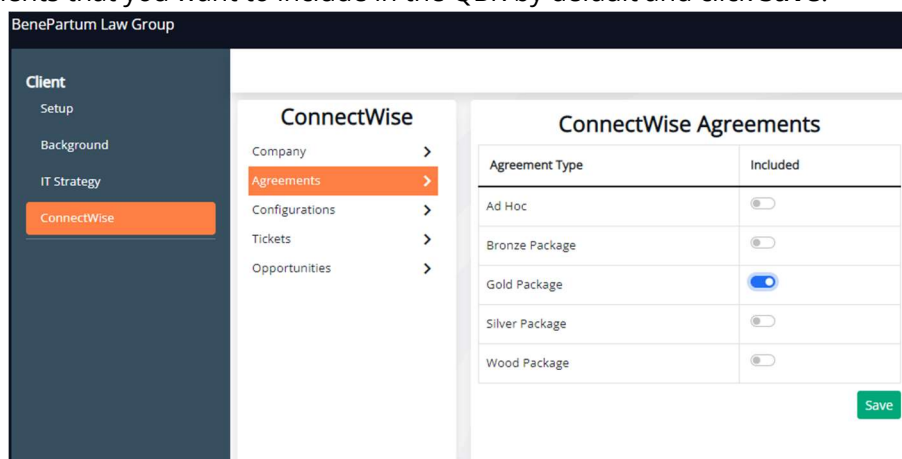

3. Navigate to *Client – ConnectWise*

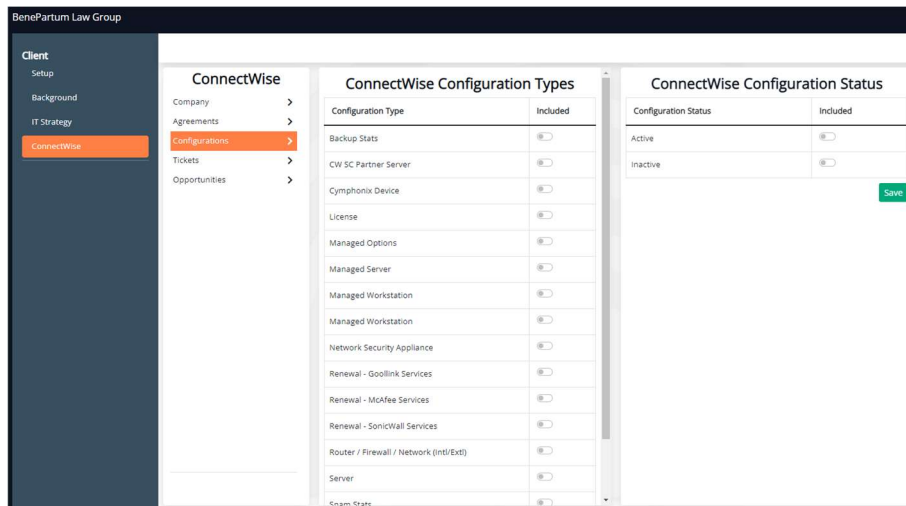

1. If the Client has no record under **Current Linked Company Details** please follow the steps under **Linking a Company To ConnectWise**.

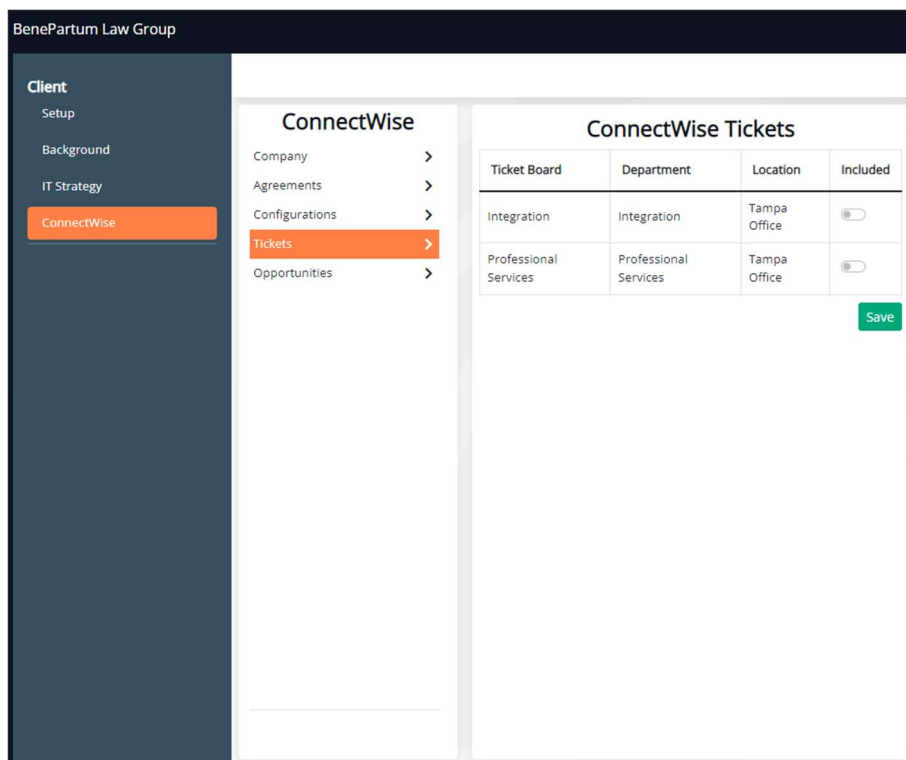

4. In *Client ConnectWise > Agreements* **ConnectWise Agreements** toggle on/off the active Agreements that you want to include in the QBR by default and click **Save**.

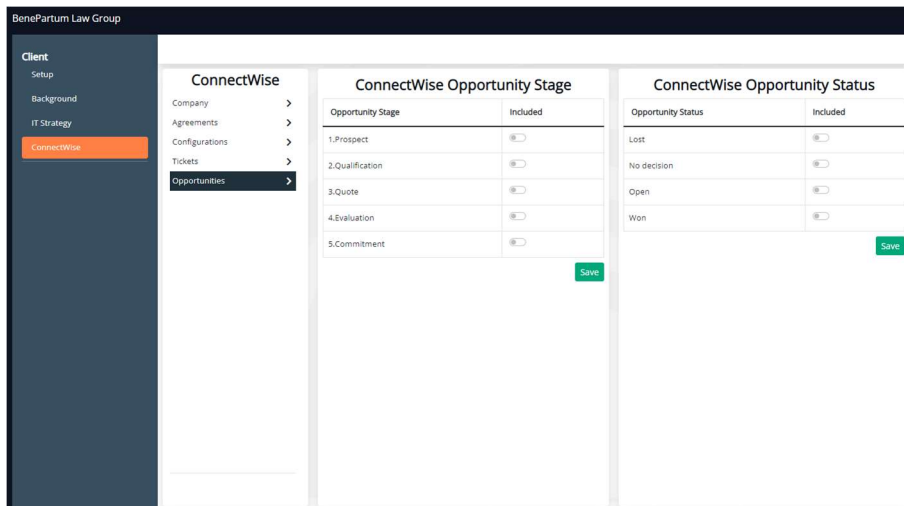

5. In *Client ConnectWise > Configurations* **ConnectWise Configuration Types** and **ConnectWise Configuration Status** toggle on/off the Configuration Types and the Configuration Statuses that correspond to Client Device Assets that you want to include in the QBR by default and click **Save** for each pod.

6. In *Client ConnectWise > Tickets* **ConnectWise Tickets** toggle on/off the Ticket Boards that you want to include in the QBR by default and click **Save**.

7. In *Client ConnectWise > Opportunities* **ConnectWise Opportunity Stage** and **ConnectWise Opportunity Status** toggle on/off the Opportunity Stages and Opportunity Statuses that you want to include in the QBR by default and click **Save** for each pod.

NOTE: If all toggles are set to off/exclude at the Client ConnectWise level, the default settings at the Tenant-Wide level will be used. If any of the toggles are switched to on/included they will override the Tenant-wide settings.

Agreement data is presented under section **3. Client Agreements** in the QBR.

Configuration data is presented under section **4. Client Assets** in the QBR.

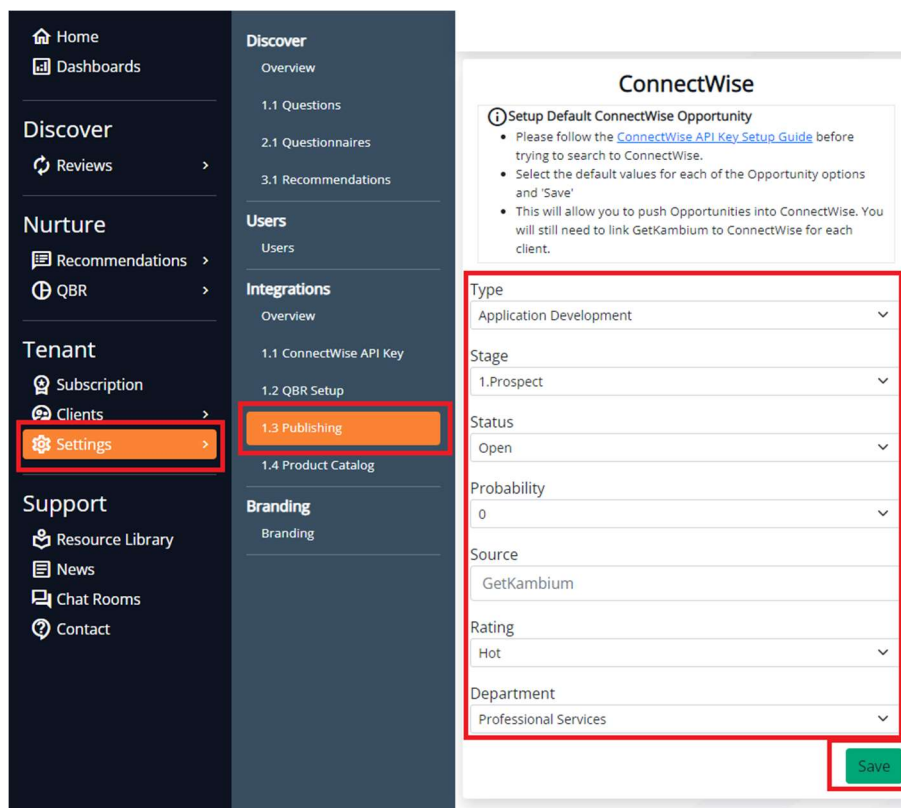

Service Ticket data is presented under section **6. Ticket Management** in the QBR.

Sales Opportunities data is presented under section **9.2 Initiatives** in the QBR.

Opportunity Setup

GetKambium can create Sales Opportunities from Recommendations. To publish Opportunities, the default values need to be setup.

1. Begin by navigating to:
 - a. *Settings – Integrations > 1.3 Publishing*
 - b. If you have not saved an API Key in GetKambium follow the instructions under 'Create an API Key and API Member in ConnectWise'
2. Under each of the dropdowns for Type, Stage, Status, Probability, Rating and Department select an option to be the default value when publishing an Opportunity.
3. In the Source field provide a text label to identify Opportunities coming from GetKambium
4. Click **Save**.

Ensure the default options are saved correctly in the **Current Default Opportunity Options**.

ConnectWise

Setup Default ConnectWise Opportunity

- Please follow the [ConnectWise API Key Setup Guide](#) before trying to search to ConnectWise.
- Select the default values for each of the Opportunity options and 'Save'
- This will allow you to push Opportunities into ConnectWise. You will still need to link GetKambium to ConnectWise for each client.

Publishing a Recommendation to Opportunities

From Discover Review

1. Within your Discover Review navigate to step **4.2 Recommendations**
2. Using the check boxes, select the Recommendations you want to publish as an Opportunity.
 - a. Click **Next**.

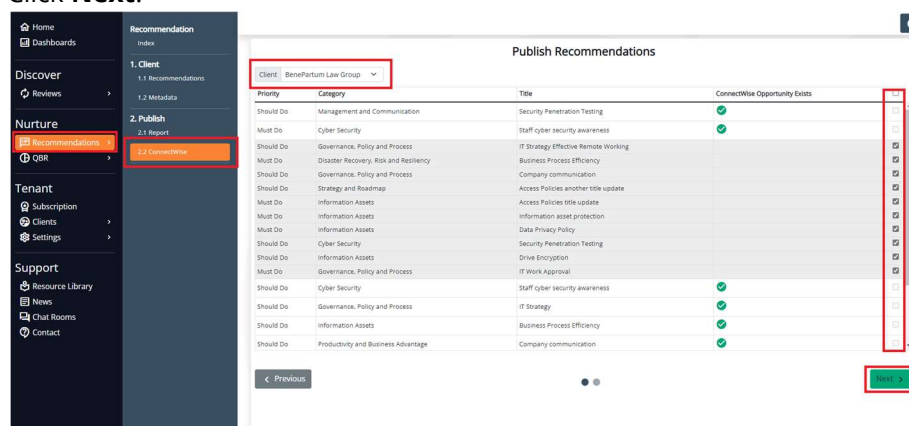

3. From the **Choose Your CRM** dropdown select **ConnectWise Manage – Opportunities**
4. Select the Sales Rep that the Opportunities should be published under.
5. Choose if you want Recommendations publishing individually, grouped by their category/theme or as one opportunity for the whole Review.
6. Click **Publish**

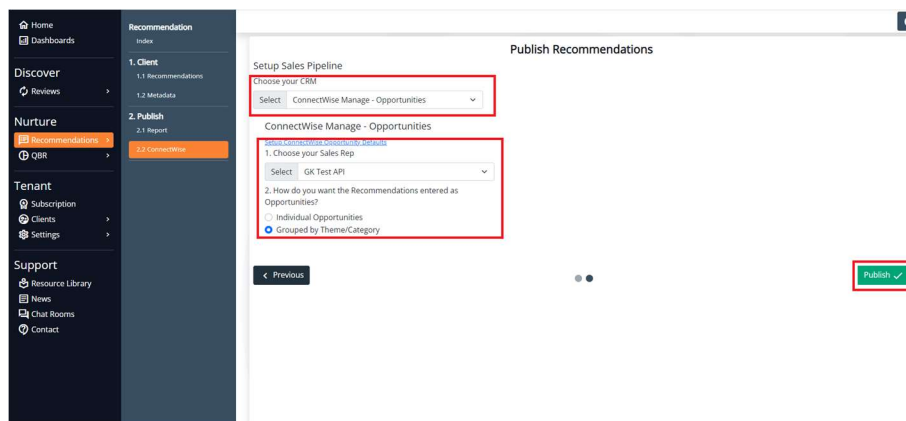

From Nurture Recommendations

1. From *Nurture Recommendations - Client* navigate to *2. Publish - 2.2 ConnectWise*.
2. Select the client from the **Client** dropdown.
3. Using the checkboxes, select the Recommendations you want to publish as an Opportunity.
 - a. Click **Next**.

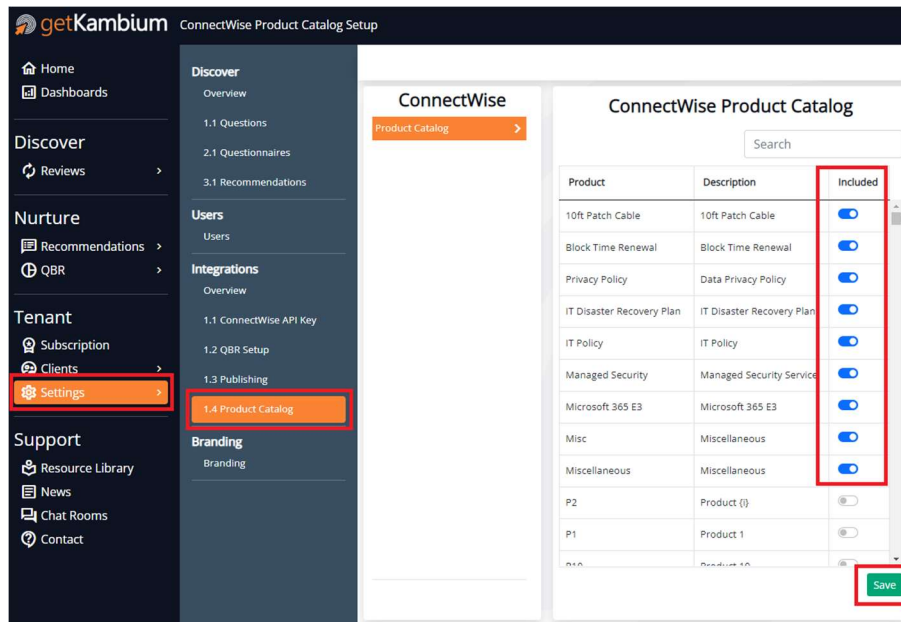

4. From the **Choose Your CRM** dropdown select **ConnectWise Manage - Opportunities**
5. Select the Sales Rep that the Opportunities should be published under.
6. Choose if you want Recommendations publishing individually, grouped by their category/theme.
7. Click **Publish**

Product Catalog Setup

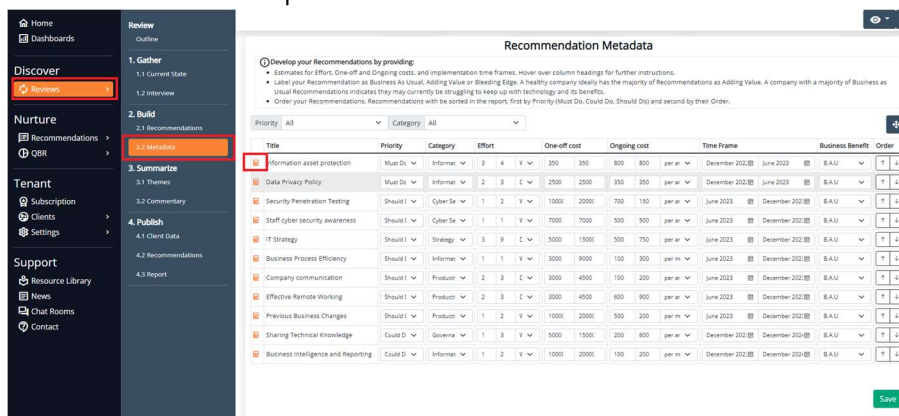

GetKambium can link to your Product Catalog to assist in quoting Recommendation costs.

1. To begin Navigate to
 - a. *Settings – Integrations > 1.4 Product Catalog.*
2. Select the Products that you want to be available when quoting via the toggles and click **Save**.

To use the Product Catalog when quoting a Recommendation.

1. Navigate to step 2.2 *Metadata* in your Discover Review.
2. Click on the **Calculator** (calculator icon at the start of the row) for the respective Recommendation to open the ConnectWise Product Calculator.

3. Click **Add ConnectWise Product** and select the Product from the Dropdown, if the Product cost is One-off or ongoing, and provide a quantity. Repeat for as many product lines are applicable for the Recommendation.
4. Click **Save Products**.

Title	Priority	Category	Effort	One-off cost	Ongoing cost	Time Frame	Business Benefit	Order										
Information asset protection	Must Do	Informat	3 4 V	350 350	800 800 per yr	December 2022 June 2023	B.A.U	↑ ↓										
<div style="display: flex; justify-content: space-between;"> Add ConnectWise Product Save Products Update Costs </div> <table border="1"> <tr> <td>Select Remote Backups</td> <td>One-off</td> <td>Quantity 1</td> <td>\$350</td> <td>X</td> </tr> <tr> <td>Select Managed Security :</td> <td>Ongoing</td> <td>Quantity 1</td> <td>\$800</td> <td>X</td> </tr> </table> <p>One-off estimate: \$350 Ongoing estimate: \$800</p>									Select Remote Backups	One-off	Quantity 1	\$350	X	Select Managed Security :	Ongoing	Quantity 1	\$800	X
Select Remote Backups	One-off	Quantity 1	\$350	X														
Select Managed Security :	Ongoing	Quantity 1	\$800	X														

- The Calculator will then provide an estimate for one-off and ongoing cost. Click **Update Costs** to change the Recommendation One-off and Ongoing costs to the estimate based on the ConnectWise Products.
